MERRYMAKING AND FUNCTIONALITY IN SERRALUNGA'S 1825 FURNITURE PIECES

Serralunga's 1825 line of garden furniture pieces allows you to turn your garden into a personalised and functional corner of the world through furnishings with simple shapes, renewed with a modern take and contained in well-defined lines.

In any entertainment environment the table is the central element: Serralunga has created **Milo basso** which is inspired by the soft lines of Gaudi's famous house. It contains just the right level of informality and originality needed for a piece of outdoor furniture and these qualities also make it suitable in some indoor environments, for example shops, showrooms and residential spaces. It is also available in a light-up version and in a version with led lighting. In both of these versions the light emphasises the plasticity of the shapes.

The ideal complement to Milo basso is **Cero**; a seat designed by Brian Steendyk for an informal yet elegant piece of furniture. Characterised by fluid, round lines, Cero manages to convey a sense of lightness through its open shape. It also can be used as a simple decorative element or footrest, becoming the distinctive feature in the space it inhabits.

Another ideal seat for the Milo table can be found in the **Lounge Cube** line which is based on the rationality of the cube, offering a functional and dynamic piece of furniture. The shape of the seat is slightly sunken, making it a perfect match for the sensuality of the table. Lounge Cube is available in various sizes to allow you to place it in several types of outdoor space. It is also available in a light-up version and with led lighting.
